

SHIVAM SHARMA

Frontend Engineer | React.js · TypeScript · Performant UI Systems

Mumbai, India | +91 8949157092 | shivamtech30@gmail.com | linkedin.com/in/shivam-sharma

PROFILE

Frontend engineer with 5+ years building production React and Next.js applications across fintech, logistics, IoT, and hospitality tech. Comfortable turning ambiguous specs into actionable plans and owning a feature end-to-end — architecture, implementation, code review, and cross-team coordination — on high-traffic B2B and B2C platforms. Currently leading frontend delivery for payment and onboarding flows at a top-5 Indian asset manager, with a strong focus on JS/TypeScript fundamentals, UI performance, and building usable, scalable interfaces in fast-paced, autonomous environments. Exploring growth into fullstack/product engineering, with working knowledge of Node.js and MongoDB.

TECHNICAL SKILLS

Core: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Redux Toolkit (RTK), TanStack Query, Context API, HTML5, CSS3

Styling: Tailwind CSS, Bootstrap, Material UI (MUI)

Data & APIs: REST API, GraphQL, Axios, Fetch, WebSocket, Swagger

Performance: Code splitting, memoization, render optimization, monorepo architecture, scalable frontend infrastructure

Tooling: Webpack, Babel, jQuery, GitHub, Jira, Trello, Postman, AWS S3, VS Code

Backend (working knowledge): Node.js, MongoDB — basics of building and consuming REST APIs and simple data models; comfortable picking up fullstack tasks

PROFESSIONAL EXPERIENCE

Lead Frontend Developer, NeoSOFT — Axis Mutual Fund (Client Engagement)

Jun 2025 – Present

Mumbai, India

- Lead frontend development for Payment, Onboarding, STP, and Switch flows, mentoring and directing a team of 4–5 frontend developers, while owning architecture, technical documentation, and code review across the module.
- Take ambiguous, cross-functional requirements from product and backend teams and turn them into actionable technical plans, executing independently and making implementation recommendations.
- Support a payment page handling ~10 lakh weekly user interactions, ensuring stability and consistent performance at scale.
- Work within a monorepo architecture spanning multiple product flows, structuring shared components, utilities, and configs for consistency and reuse across teams.
- Drive adoption of clean-code and review standards across the team, raising code consistency and cutting down defects reaching QA.
- Optimized page load and rendering performance, improving key metrics by ~40% through code splitting, memoization, and reduced re-renders.

Stack: React, TypeScript, Next.js, Monorepo architecture

Frontend Developer, Extern Labs

Jul 2022 – May 2025

Multiple client projects across logistics, IoT, travel, hospitality, and fintech

NitroXpress — third-party logistics platform with role-based dashboards for Admin, B2B, B2C, delivery staff, and internal employees

- Built role-specific, highly usable dashboards with secure, role-based access control for five distinct user types.
- Implemented an in-app payment gateway and wallet system alongside manual shipment tracking, supporting the platform's core transaction flow.

Stack: React.js, Redux Thunk, Redux Toolkit (RTK), Axios, Bootstrap, CSS

Tipco — real-time IoT monitoring dashboard for embedded hardware

- Built live, performant dashboards surfacing vibration, motor rotation, and pressure metrics from embedded IoT devices.
- Implemented WebSocket-based streaming so metrics update continuously without page refresh, improving operators' ability to catch issues in real time.

Stack: React.js, TanStack Query, WebSocket, Axios, Bootstrap, CSS

NueGo (GreenCell Mobility) — booking platform for India's first premium electric intercity bus service

- Built and maintained the tour-and-travel booking pages and additional core pages of the customer-facing site.
- Delivered the full GreenCell Mobility corporate website, focusing on responsive layout and clean UI across devices.

Stack: React.js, Axios, Bootstrap, CSS

HarborBites — QR-based restaurant ordering and Kitchen Display System

- Built the QR-to-order customer flow integrated with a live Kitchen Display System, replacing paper tickets.
- Implemented real-time order and table-status updates via WebSocket, improving kitchen coordination and order turnaround.

Stack: React.js, Redux Toolkit (RTK), WebSocket, Axios, Tailwind CSS, CSS

Fintellir — stock analytics platform for ticker and portfolio data

- Built data ingestion flows for client-specific Excel sheets and stock ticker feeds, ensuring accurate parsing and display.

Stack: Next.js, Context API, Axios, Tailwind CSS, CSS

Frontend Developer, Maitretech Solutions

Jun 2021 – Jun 2022

AirPMO — construction management platform for multi-site project oversight

- Built zone-based access management, restricting permissions by project area and role.
- Implemented multi-role permission structures supporting varying levels of site responsibility and authority.

Stack: Next.js, Axios, Tailwind CSS, CSS

Intern, Reliance Jio — RF Macro Planning and Optimization

Jun 2018 – Jul 2018

- Contributed to a network coverage and quality improvement project, gaining hands-on exposure to telecom architecture, frequency reuse, and signal optimization.

ACHIEVEMENTS

- 1st place, Extern Labs internal hackathon — built a real-time collaboration tool using React and WebSockets.

EDUCATION

B.Tech, Arya Institute of Engineering and Technology, Jaipur

2015 – 2019

Higher Secondary, St. Mary's Convent Higher Secondary School, Bankhedī

2015
